Aeron® Chairs
Peak performance all day

BREAKTHROUGH DESIGN AND PERFORMANCE

Some designs defy imitation, and the Aeron chair is one of them. Bill Stumpf and Don Chadwick purposefully designed it to be like no other chair—replacing foam and fabric with Pellicle[®], a breathable, form-fitting material that provides truly customized comfort and support. Extensive research shaped the original design. Continuing research ensures that Aeron remains the benchmark for performance in ergonomic seating. You won't find anything else like it, anywhere.

ADVANCED ERGONOMICS

The Kinemat[®] tilt allows the body to pivot naturally and simultaneously at the ankles, knees, and hips for smooth, proper support in a 30-degree tilt range. Because research shows that many people are sitting upright and forward, Aeron offers the PostureFit[®] option. It provides custom-fitted support at the lower back that promotes proper alignment of the spine for a healthful, comfortable posture.

VERSATILE LOOKS

Extensive material and finish choices make Aeron a comfortable addition to nearly any interior. From the pinstripe look of Classic to the gentle swell of Waves to the geometric shape of Tuxedo, Pellicle patterns in neutral colors offer a variety of choices. Titanium, polished aluminum, and graphite finishes complement the full selection of Pellicle colors.

SIZED TO FIT

Bill Stumpf and Don Chadwick designed the Aeron chair in three sizes. The B size is the best fit for most people. The A size fits those who are smaller and lighter; the C size fits taller and heavier people. Anybody—from the 1st-percentile female to the 99th-percentile male—can find a perfect Aeron fit.

RESPONSIBLE DESIGN

Herman Miller builds the Aeron chair responsibly, conscious of its environmental impact. It's 94 percent recyclable, with 66 percent recycled content.
